## EDUCATION

<b>Zhejiang University</b>	Sep 2020 - Mar 2023
College of Computer Science and Technology Master student, Computer Science	Hangzhou, China
GPA: 3.98/4.00	
<b>Zhejiang University</b>	Sep 2016 - Jun 2020
College of Computer Science and Technology Bachelor of Engineering, Digital Media Technology	Hangzhou, China
GPA: 3.85/4.00 The last two years GPA: 3.98/4.00	

## PUBLICATIONS

- **Xuan Yang**, Yang Yang, Jintao Su, Yifei Sun, Shen Fan, Zhongyao Wang, Jun Zhan, and Jingmin Chen. Who's Next: Rising Star Prediction via Diffusion of User Interest in Social Networks. In IEEE Transaction on Knowledge and Data Engineering, doi: 10.1109/TKDE.2022.3151835, 2022
- **Xuan Yang**, Yang Yang, Chenhao Tan, Yinghe Lin, Zhengzhe Fu, Fei Wu, Yueting Zhuang. Unfolding and Modeling the Recovery Process after COVID Lockdowns. Scientific Reports Accepted.
- **Xuan Yang**, Qianjin Tao, Xiao Feng, Donghong Cai, Xiang Ren, and Yang Yang. Multimodal Learning with Graph Alignment on Social Media. Preprint.
- Taoran Fang, Zhiqing Xiao, Chunping Wang, Jiarong Xu, **Xuan Yang**, Yang Yang. DropMessage: Unifying Random Dropping for Graph Neural Networks. Distinguished paper, AAAI 2023.
- Jintao Su, Yang Yang, **Xuan Yang**, Yuxiao Dong and Chilie Tan. DeepGraphlet: Estimating Local Graphlet Frequencies with Graph Neural Networks. Under review.
- Teng Ke, Yang Yang, Shiliang Pu, **Xuan Yang**, Qianjin Tao, Yifei Sun, Weihao Jiang, Hui Wang and Yingye Yu. Detecting Telecommunication Frauds by Human-in-the-Loop Graph Neural Networks. Under review.

## RESEARCH EXPERIENCE

<b>Multimodal Learning with Graph Alignment on Social Media</b>	Jun 2022 - Present
Institute for Artificial Intelligence, Zhejiang University	Hangzhou, China
<ul style="list-style-type: none"><li>• Incorporate social network with text and image data to enhance user representation learning and create the first large-scale multimodal social media dataset with graph information.</li><li>• Propose a multi-step graph alignment pretraining task for mutual information maximization and develop an efficient graph multimodal pretraining framework to fuse multiple modalities.</li></ul>	
<b>Unfolding and Modeling the Economic Recovery after COVID Lockdowns</b>	Jun 2021 - Feb 2022
Institute for Artificial Intelligence, Zhejiang University	Hangzhou, China
<ul style="list-style-type: none"><li>• Propose a novel computational method based on electricity data to understand how cities bounce back from lockdown, which is critical for promoting the global economy and preparing for future pandemics.</li><li>• Quantified and modeled economic recovery, chain effect between sectors and support policy effects.</li><li>• Conducted a case study on Hangzhou, China that discovered diverse recovery patterns and various policy effects.</li></ul>	
<b>Estimating Graphlet Counts on Billion-scale Graphs</b>	May 2021 - Dec 2021
Institute for Artificial Intelligence, Zhejiang University	Hangzhou, China
<ul style="list-style-type: none"><li>• Estimated the graphlet counting, whose time complexity is <math>O(n^3)</math>, with our designed DeepGraphlet with k-tuple features and multi-task.</li><li>• Achieved 60%+ improvement on the estimation accuracy on real graphs; 20x speedup on billion-scale graphs.</li></ul>	
<b>Alleviate Recommendation System Disequilibrium</b>	Jan 2021 - May 2021

Data and Technology Department, Alibaba

Hangzhou, China

- Alleviated the unfair recommendation problem in online marketing by proposing the rising star problem.
- Introduced social network data to support the rising star prediction. Designed a RiseNet with a novel GNN module to quantify the user interest in dynamic user sharing networks and a coupled mechanism to capture the interaction between the user graph data and item time-series data.
- Achieved 30%+ improvement in F1 score on the real-world Taocode.

## INTERNSHIP EXPERIENCE

---

### Data and Technology Department, Alibaba Group

Oct 2020 - Dec 2021

Machine Learning Intern, Data Assets and Algorithm team

Hangzhou, China

- Analyzed the family recommendation on Taobao (the largest e-commerce platform in China) and designed a family marketing model for enhancing family goods recommendation.
- Built the billion-scale Taocode recommendation datasets and developed an algorithm to recommend items for "Xiaoheihe" and "Taojianghu" functions on Taobao APP, boosting CTR by 2.3% compared with the baseline production strategy.

### Center for Magnetic Nanotechnology, Stanford University

Jan 2019 - Mar 2019

Research Intern, Probing Protein-Protein Interactions with High-Throughput GMR Protein Arrays

Stanford, CA

- Helped collect the amount of seven viruses in serum of 300 patients through GMR biosensors.
- Used machine learning models to explore the relationship between the viruses and the liver cancer and discovered weak correlation between the viruses and the liver cancer.

### Biomedical Institute for Global Health Research and Technology at NUS

Jun 2018 - Aug 2018

Research Intern, the Taste Healthy project, Big Brain

Singapore

- Helped develop a mobile app for the Taste Healthy project.
- Developed a crawler to collect food pictures from the web and trained ResNet on the collected data for food identification.

## SELECTED ACTIVITIES

---

### Internet Association of Zhejiang University

Oct 2020 - Present

- Mentored six junior students in machine learning interesting group to conduct related projects and study research topics

### The Volunteer Teaching at Aba Tibetan and Qiang Autonomous Prefecture

Aug 2018 - Sep 2018

- Taught the students at the Tibetan High School (math class) and Futian Hope Primary School (astronomy class).

### Zhejiang University Creative Media Student Association, President

Sep 2017 - Jun 2018

- Organized multimedia-related activities on campus (e.g., "Hugging Me" that helped eliminate prejudice among people).

## SELECTED HONORS

---

Graduate of Triple A graduate, Zhejiang University

2021 - 2022

Tencent Technology Excellence Scholarship

2021 - 2022

First-class Academic Prize, Zhejiang University

2021 - 2022

Award of Honor for Graduate, Zhejiang University

2021 - 2022

## MISCELLANEOUS

---

- **Skills:** Python; Pytorch; C++; 3D Modeling (Zbrush, Maya); VR programming (Unity; Unreal Engine)
- **Languages:** TOFEL 108
- **Hobbies:** Photography (PS/ PR); Piano; Painting; Hiking
